

## Beta Usability Test

- The three testers were my principal, STEM teacher and one of my 1<sup>st</sup> grade students.
- My principal had some great suggestions about adding a list of nonfiction books that teachers and parents could use in school or home. I have added that to my website.
- The STEM teacher had some great ideas about embedding quizzes and games right onto the website instead of clicking on links. I would like to look into this in the future.
- The 1<sup>st</sup> grader's responses were quite funny! I think my student really enjoyed using the website with my assistance. She said she wanted to play more games. In the future, I may add a link with extra games to play if a student finishes early or just wants to learn more at home.
